Did you know Massey had a set of attributes which any graduate should be able to display in their attitudes, skills and knowledge?

You get the chance to develop these attributes in your regular courses

You can work towards showing that you have these attributes through Massey micro courses!

You can do 3 micro courses every year*
*every 120 credits if you are studying part time

I found these micro courses really useful and practical - I did the maximum - nine micro courses over 3 years.

We had one practical assessment per course and every thing we did was linked to our own experience and goals.

I did six of these micro courses. Three in the 1st year and three more in 3rd year.

One career-readiness micro course per year was a great way to work through thinking about where I wanted to be in the workplace and how to get there.

I really needed to focus on 'Partnering with Māori' so I did three micro courses at 3 levels in that area over the course of my degree.

I enjoyed the variety and alternative rhythm of the micro-course experience. The facilitators worked in a peer and mentor sort of capacity and we journeyed together as a group.

We did most of the same micro course and some different. We found it interesting how our portfolios looked and felt so unique despite our similar journeys.

What I liked was how the micro course locked in with the other courses I was doing. I was able to apply the learning straight into the priorities now.

At the end of my micro course experience, I had a portfolio of examples of how I, Luke Douglas, reflected the graduate attributes. I found that an asset as I started to apply for jobs back in Aotearoa.

I liked the opportunity to meet students studying in Health, Humanities and Business. Also got to see distance students. You don't get this mix in my usual courses.

Ayse Ozturk

Bachelor of Arts: College of Humanities & Social Science
Full time | Year 1

I have just left school and have started a BA. I am not sure if I want to major in sociology or geography so I have kept my options open. Taking three micro courses has allowed me to have a lighter first semester. I am interested in getting hands on practice around managing my study in semester one.

AYSE'S YEAR

+ BA CORE COURSES

+ MAJOR COURSES

+ ELECTIVE COURSES

+ MICRO COURSES
